THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 40% the amount of undiscounted fees, and micro entity fees are 20% the amount of undiscounted fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), by mail or fax, or via the USPTO patent electronic filing system.

By mail, send to: Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

By fax, send to: (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 6 should be completed where appropriate. All further correspondence will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications. **Because electronic patent issuance may occur shortly after issue fee payment, any desired continuing application should preferably be filed prior to payment of this issue fee in order not to jeopardize copendency.**

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. The United States Patent and Trademark Office (USPTO) collects the information in this record under authority of 35 U.S.C. 2. The USPTO's system of records is used to manage all applicant and owner information including name, citizenship, residence, post office address, and other information with respect to inventors and their legal representatives pertaining to the applicant's/ owner's activities in connection with the invention for which a patent is sought or has been granted. The applicable Privacy Act System of Records Notice for the information collected in this form is COMMERCE/PAT-TM-7 Patent Application Files, available in the Federal Register at 78 FR 19243 (March 29, 2013).
https://www.govinfo.gov/content/pkg/FR-2013-03-29/pdf/2013-07341.pdf

Routine uses of the information in this record may include disclosure to:

1) law enforcement, in the event that the system of records indicates a violation or potential violation of law;
2) a federal, state, local, or international agency, in response to its request;
3) a contractor of the USPTO having need for the information in order to perform a contract;
4) the Department of Justice for determination of whether the Freedom of Information Act (FOIA) requires disclosure of the record;
5) a Member of Congress submitting a request involving an individual to whom the record pertains, when the individual has requested the Member's assistance with respect to the subject matter of the record;
6) a court, magistrate, or administrative tribunal, in the course of presenting evidence, including disclosures to opposing counsel in the course of settlement negotiations;
7) the Administrator, General Services Administration (GSA), or their designee, during an inspection of records conducted by GSA under authority of 44 U.S.C. 2904 and 2906, in accordance with the GSA regulations and any other relevant (i.e., GSA or Commerce) directive, where such disclosure shall not be used to make determinations about individuals;
8) another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c));
9) the Office of Personnel Management (OPM) for personnel research purposes; and
10) the Office of Management and Budget (OMB) for legislative coordination and clearance.

If you do not furnish the information requested on this form, the USPTO may not be able to process and/or examine your submission, which may result in termination of proceedings, abandonment of the application, and/or expiration of the patent.

/JOHN D HOLMAN/ Examiner, Art Unit 3667	/Hitesh Patel/ Supervisory Patent Examiner, Art Unit 3667

DETAILED ACTION

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

Status of Claims

Claims 1-21 and 23 are currently pending and addressed below; claims 1, 6, 9, 12, 20, and 21 have been amended; and claim 22 has been cancelled.

Response to Amendment

In response to Applicant's amendments, Examiner withdraws the previous objections to the specification; withdraws the claim objections with respect to claims 1, 12, and 19; withdraws the claim interpretation of claim 9 previous containing contingent language; withdraws the previous § 112(f) interpretations of "attention module" and "attention adjust module"; withdraws the previous § 112(b) rejections; withdraws the previous § 103 rejections; and withdraws the previous § 101 rejections of claims 1-23.

Response to Arguments

Applicant's arguments, see Remarks, filed 5/19/2026, with respect to the § 101 rejection have been fully considered and are persuasive. The § 101 rejection of claims 1-21 and 23 has been withdrawn.

Specifically, Applicant argues that "conventional Transformer architectures cannot readily be applied to context-based traffic state classification because they are designed for sequential dependencies and do not naturally incorporate variables such as traffic diffusion, time, vehicle type

and road type, as set forth in paragraph [0008] of the application," and that the "disclosed adjustment to attention scores is described as a unique method for accounting for non-sequential, context-based variables in paragraph [0081] of the application, and is further described as enabling Transformer advantages to be used for data with non-sequential dependencies in paragraph [0082] of the application," which "improves the use of Transformer-based prediction for route-specific traffic state classification." *Remarks* at pp. 9-10. Applicant's arguments are persuasive and the rejection has been withdrawn.

Applicant's arguments with respect to the § 103 rejection under Sharma and Li have been fully considered and are persuasive. The § 103 rejection of claims 1-23 has been withdrawn. See reasons below.

REASONS FOR ALLOWANCE

Claims 1-21 and 23 are allowed.

The following is an examiner's statement of reasons for allowance:

The combination of claim limitations of ***obtaining a diffusion graph representative of a specific route comprising edges connected by nodes, wherein a weight associated with each edge comprises a respective transition probability computed as a ratio of an edge weight from a source road segment to a target road segment over a sum of all outgoing edge weights from the source road segment, and using a transformer-based framework to predict a traffic condition, wherein the framework comprises a multi-head attention mechanism and an input to receive dimensions for each segment including a transition probability and temporal data, and further comprising an attention adjustment layer within the multi-head attention mechanism configured to***

generate a weight modifier for modifying attention weights based on the likelihood of a traffic state influencing a traffic state on another road of claims 1 and 20, when considered with the other claim features, renders the independent claims, as well as their dependents, novel and non-obvious over the prior art of record.

The closest prior art, Sharma and Li teaches receiving an input representative of a specific route comprising one or more road segments with a road network, obtaining a graph representative of the specific route, input configured to receive a set of input dimensions for each segment of the route and temporal data, and using a transform-based framework to predict a transition probability. However, as pointed out by Applicant on pages 10-11 of the Response dated 5/19/2026, the combination of Sharma and Li does not teach a weight associated with each edge comprising a respective transition probability computed as the ratio of an edge weight from a source road segment to a target road segment over a sum of all outgoing edge weights from the source road segment. *Remarks* at p. 10. Rather, Sharma discloses "a directed graph where nodes represent road segments and edges represent transitions (Sharma paragraph [0045]), but these edges are not weighted with probabilities, let alone probabilities computed via the claimed ratio. Sharma predicts traffic based on averaged filtered time differences between entry points (Sharma paragraph [0039]), which is a fundamentally different computational approach." *Remarks* at pp. 10-11.

Furthermore, Applicant points out that neither Sharma nor Li teach an attention adjust layer incorporated within the multi-head attention mechanism configured to generate a weight modifier based on the likelihood of a traffic state on one road segment influencing a traffic state on another road segment. *Remarks* at p. 11. Rather, Li describes "an attention module, but it is used to re-weight supply-demand vectors for the purpose of determining vehicle repositioning rewards (Li paragraph [0078]). Li's attention mechanism does not receive route-segment input

dimensions to generate a modifier based on the likelihood of one road segment's traffic state influencing another." *Id.* (emphasis in original).

As such, the combination of Sharma and Li does not teach the combination of obtaining a diffusion graph representative of a specific route comprising edges connected by nodes, wherein a weight associated with each edge comprises a respective transition probability computed as a ratio of an edge weight from a source road segment to a target road segment over a sum of all outgoing edge weights from the source road segment, and using a transformer-based framework to predict a traffic condition, wherein the framework comprises a multi-head attention mechanism and an input to receive dimensions for each segment including a transition probability and temporal data, and further comprising an attention adjustment layer within the multi-head attention mechanism configured to generate a weight modifier for modifying attention weights based on the likelihood of a traffic state influencing a traffic state on another road, as required by independent claims 1 and 20. No other prior art has been found which remedies the deficiencies of the Sharma and Li combination. Therefore, the claims are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. **U.S. Pub. No. 2021/0247201 to Hori et al.** teaches use of an attention module and attention weights for traffic prediction (¶¶ [0053] – [0062]).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any nonprovisional extension fee (37 CFR 1.17(a)) pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
