THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

1. The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/12/2026 has been entered.

Status of Claims

3. **Claims 1-20 are allowed.**

REASONS FOR ALLOWANCE

4. Claim(s) 1-20 are allowed.

5. Applicant's arguments, see pages 22-44, filed 07/17/2026, with respect to claims 1-20 rejected under 35 USC 103 have been fully considered and are persuasive. The 103 rejection of claims 1-20 has been withdrawn.

6. Applicant's arguments, see pages 11-13, filed 07/17/2026, with respect to claims 1-20 rejected under 35 USC 101 have been fully considered and are persuasive. The 101 rejection of claims 1-20 has been withdrawn. Additionally, the closest art of record is noted below.

7. The closest art of record, US Patent Application Publication 20130238455 to Laracey, et al., discloses “Pursuant to some embodiments, transaction methods, systems, apparatus, means and computer program code are provided for conducting payment transactions which include selecting a mobile payment option at a point of sale, obtaining, using a mobile device, a checkout token printed or otherwise displayed at the point of sale, selecting, using said mobile device, a payment account, viewing, on the mobile device, payment transaction details associated with a pending payment transaction, and authorizing, using the mobile device, the payment transaction. Pursuant to some embodiments, the checkout token is obtained by the mobile device by capturing a barcode image, key entering the checkout token, by wireless communication or otherwise receiving the checkout token at a mobile device.”

8. The closest art of record, US Patent Application Publication 20140100973 to Brown, et al., discloses “A payment device presents a matrix barcode on a smartphone display screen for scanning by a merchant at a point-of-sale terminal. The consumer authenticates with their payment processor by logging in with their smartphone through a back channel. A successful log-in is rewarded with a matrix barcode the consumer can allow the merchant to scan if the particulars and price of the proposed transaction are acceptable. A transaction summary and request for approval arrive back at the consumer's smartphone through the back channel. Approval can be indicated by the entry of a user PIN code, and the transaction is complete.”

9. The closest art of record, US Patent Application Publication 20140101036 to Phillips, et al., discloses “Several transaction embodiments will be described herein. In general, a first embodiment will be referred to as an "m-commerce embodiment". In the m-commerce embodiment, a consumer may make a purchase (or other transaction) on a Web site that they are browsing on a browser of their mobile device. A transaction pursuant to the present invention may be initiated based on a direct trigger from the mobile browser (or by a merchant mobile application) or by a scan of a static Quick Response

("QR") code from printed media (such as a billboard, a newspaper or magazine advertisement, etc.). Details of such m-commerce embodiments will be provided further below. A second embodiment will be referred to herein as an "e-commerce embodiment". In the e-commerce embodiment, the consumer is conducting a purchase (or other transaction) from a remote merchant site that the consumer is browsing on a browser of a device such as a personal computer, tablet, television, or the like. During the browsing on the device, the consumer may be prompted (or choose) to conduct the transaction using their mobile device and may initiate the transaction by either scanning a dynamic QR code from the merchant site (e.g., by capturing the QR code from a display screen associated with the personal computer, tablet, television or the like) or by other methods which will be discussed further herein. In either embodiment, transactions conducted using the present invention provide reduced fraud risk, thereby allowing the transactions to be considered "card present" transactions. A number of other desirable results and features will become apparent to those skilled in the art upon reading the following disclosure."

10. The closest art of record, US Patent Application Publication 20190026723 to Narasimhan, et al., discloses "Methods and systems for performing an advertisement-based electronic transaction using a mobile device are provided herein. According to one aspect, the subject matter described herein comprises a system for performing an advertisement-based electronic transaction using a mobile device. The system comprises a database for storing and maintaining payment information for mobile users and a mobile backend server that receives, from a mobile device of a user, first information about an item or transaction, wherein the mobile device received the first information from an advertisement available to the mobile device, and second information about the user, that processes the first and second information to determine transaction information and to generate payment information, and that sends the transaction and payment information to a payment network for processing the ecommerce transaction."

11. The closest art of record, US Patent Application Publication 20130048714 to Sharma, et al., discloses "Embodiments of the invention facilitate payment transactions by integrating the image capture and image processing capabilities of certain mobile devices with the card-based payment transaction infrastructure. In some embodiments, a camera contained in a mobile device is used to capture an image of a barcode that is visible on the surface of a substrate. The barcode may represent or otherwise encode one or more of payment account data, consumer authentication data, consumer profile data, or other relevant information. In some embodiments, the captured image may be processed by the mobile device to extract the payment account data, authentication data, or other relevant data. This data may then be communicated to a data processing element that is connected to, or forms part of, a payment processing network in order to conduct the desired payment transaction."
